

The Assistive Technology Unit (ATU) of the University of Illinois at Chicago (UIC) announces **3 Fall Seminars:**

iPad Applications for AAC and Visual Strategies: Making it work

Presented by: ATU Augmentative and Alternative Communication Team Renée Jordan MS, CCC-SLP/L and Patricia Politano, PhD, CCC-SLP/L, ATP

October 12, 2011 9:30am-2:30pm

Early Registration Deadline September 30, 2011!

Participants will learn about a variety of apps for augmentative communication and how to modify iPads for use as AAC systems. The afternoon will be dedicated to the demonstration of apps designed for individuals with Autism and others who benefit from visual supports. Information will also be provided on how to choose apps, manage apps and modify iPads for alternative access methods. This seminar is designed for speech/language pathologists, occupational therapists, special educators and assistive technology specialists.

Fees and Registration: \$100 per person includes lunch. Groups of 3 or more from the same location \$90 per person. Registration Fee after September 30, 2011 is \$110 per person. **Space is limited so register early!**

For more information on this seminar and enrollment, visit www.idhd.org/ATUTrainings/aac

.....

The following 2 Seminars are presented by ATU Seating and Wheeled Mobility Clinicians
Lori Peculis, PT, ATP and Brenda Sposato, MEBME, ATP

Early Registration Deadline October 10, 2011! Group Rates Available. See individual
websites for details.

For a single course: \$140 per person. After October 10th, \$150 per person. **For both
courses:** \$250 per person. After October 10th, \$275 per person.

Wheelchair Seating and Positioning Basics for the Clinical and School-Based Therapist

October 24, 2011 9am-4pm

This course, originally presented in February 2011, is offered again as the first in a series of seating, positioning and wheeled mobility workshops. Lecture and interactive hands-on demonstrations will focus on the basic elements of a wheelchair seating and positioning assessment for children and adults with physical disabilities.

Manual Wheelchairs: Designs and Adjustments

October 25, 2011 9am-4pm

This is the second in the series of wheelchair seating and mobility workshops offered by the ATU. Lecture materials highlight designs and features of manual wheelchair bases for children and adults. During the hands-on sessions, participants will configure wheelchair frames to meet an individual's functional mobility needs.
